

Using the Sherwood Syndrome Module
Created by: Brian Mason (brian448@sbcglobal.net)

Overview

The Sherwood Syndrome module lets you play West End Games Sherwood Syndrome game on your computer.

Once you enter the module you will be presented with the Main Toolbar. This is a series of buttons along the top of the main window that allow you to play the game.

Prepare for Play

Start a New Game from the File Menu.

Press F1 to open the Map Board. The initial starting spaces for the Royalists, Clergy, and King's Men have already been set. The Markers for Royal Morale, Witchcraft, Rebel Warchest, and Royal Orders are at their starting values. The crew of the Enterprise is in the Enterprise box.

Press F6 to open the Dice Cup Board. The Archon Crew and the Neutrals need to be randomized to the board. Place all of the Neutrals in the Dice Cup. Right Click the stack and choose 'Draw Multiple Cards' from the menu. Draw 8 of the Neutrals and place that stack aside for a moment. Put the remaining stack of Neutrals near the bottom of the board. Stack the eight Neutrals you just chose and the Archon Crew together. Make sure that the whole stack is selected and right click. Chose 'Imprisoned' from the Menu. This will place the imprisoned overlay on each person in the stack. Now place the stack into the Dice Cup. Draw from the cup one at a time and place one imprisoned person in each town space. Take the stack of Neutrals that is near the bottom of the board and place it in the Dice Cup. Draw eight more and place them one by one on the map in any space you choose. You may delete the remaining Neutrals in the Dice Cup. They will not be used in this game.

You are now ready to play.

Notes:
