

The TL:DR guide to the **A GEST OF ROBIN HOOD** Vassal module

- 1) Choosing **Automatic Setup** will automatically create the Event deck (with the cards shuffled and sequenced as required) and placed it on the main game window, then...
- 2) The **Robin Hood** player must complete the game setup by secretly placing the Robin Hood and three Merry Men pieces as per the game rules.
Note: The Private Windows can be used to secretly select and hide pieces out of view of the other player. Those hidden pieces, e.g. the Merry Men or Carriages can then be dragged on to the game board. Or simply **Peek** at them using the right hand menu.
- 3) The next card from the Traveller and Event decks can be drawn and revealed using the respective toolbar buttons.
- 4) The dice and the game charts can be found on the toolbar.
- 5) The Alt key and left hand mouse button click launches the **map flare** functionality.
- 6) Pieces and places have useful shortcuts via their right mouse button menu.
