REINFORCEMENTS

Reinforcement Charts. When a code letter follows the turn listing, the Soviet player receives reinforcements in addition to those listed on the main order of battle. Consult the indicated chart for the reinforcements: sf: Soviet other forces chart, sa: Soviet air order of battle chart, II: Lend-Lease forces chart, Ia: Lend-Lease aircraft chart.

Replacements. Special replacements are received from the start of the game. Regular replacements are received starting on Aug I 41. To help keep track of when infantry replacements are received (since the frequency of their arrival changes during the game), a code letter of ir follows the turn listing on each turn infantry replacements are received. See the Soviet replacements chart for the replacement rates.

Oil. Baku (9A:1506) produces 2 resource points on every turn.

Artillery Division Assembly

The available for assembly section of the Soviet other forces chart lists when artillery divisions are available to be assembled. Artillery divisions are assembled from non-divisional artillery units, as shown below. When assembling these divisions, a different non-divisional unit of the same unit type may be substituted for a non-divisional unit listed below, as long as the substituted unit's attack, defense, and movement ratings are equal to or greater than those of the specified unit. For example, a 3-2-8 Art X may be subsituted for a 3-2-6 Art X or a 2-6 Art X, but not for a 3-6 Art X (its defense strength is too low) or a 2-1-8 Mortar X (wrong unit type).

9-6 Art XX: 1×3 -6 Art X, 1×3 -2-6 Art X, 1×2 -6 Art X, 1×2 -1-8 Mortar X 11-8-6 Art XX: 4 × 3-2-6 Art X

12-8-8 Art XX (Gds): 4 × 3-2-6 Art X

14-6 Art XX: 2 × 3-6 Art X, 2 × 3-2-6 Art X, 1 × 2-6 Art X, 1 × 2-1-8 Mortar X 15-8 Art XX (Gds): 2 × 3-6 Art X, 2 × 3-2-6 Art X, 1 × 2-6 Art X, 1 × 2-1-8 Mortar X

Unit Conversion Possibilities

The available for conversion section of the Soviet other forces chart lists when units may be converted to the units shown on the chart. The units which may convert to the listed units are as follows:

A 14-4-6 Rkt Art XX (Gds) may convert to a 15-3-8 Rkt Art XX (Gds).

A 9-6 Art XX may convert to a 10-8 Art XX (Gds).

A 9-6 Art XX may convert to a 14-6 Art XX.

A 10-8 Art XX (Gds) may convert to a 15-8 Art XX (Gds).

A 0-1-5 Cons X may upgrade to a 2-6 Aslt Eng X, at a cost of 1 infantry RP.

A 1-2-6 Eng X may convert to a 2-6 Aslt Eng X.

Initial Rail Capacity: 75.

Partisans (If Optional Rule 40 is used): Roll two dice and add 12 to the result. This is the number of Soviet partisan units in play at the start of the scenario.
