

Instructions

Download the 1.1 module and the zipped Home Team extensions and Away Team extensions folders for 2007 and 1987.

Unzip the extensions folders. Do not unzip the module.

Create a folder called Statis Pro and put the module in this folder.

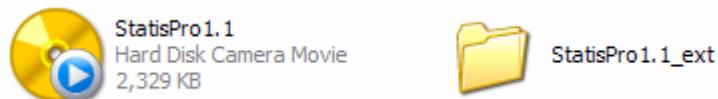

Within the Statis Pro folder create another folder called “StatisPro1.1_ext”

Before starting a game copy one Home team extension and one Away team extension into the “StatisPro1.1_ext” folder.

When you start the game by playing the module the teams that you have put into the “StatisPro1.1_ext” folder will automatically load.

Once you have finished your game delete the two team extensions from the “StatisPro1.1_ext” folder.

Below is what your Statis Pro folder should contain:

The Hard Disc Camera Movie is the module and may appear differently on your computer.

The contents of the “StatisPro1.1_ext” folder should look something like this when two team extensions have been copied to it:
